As is my usual recommendation, begin with the lowest priced medication. This could be argued against by saying that, in the case of economic buy cyproterone in Australia, for instance, the damage to the mothers future is certain. True, her value-filled, meaningful future is granted but so is the detrimental effect that the fetus will have on it, once born. This certainty cannot be balanced by the UNCERTAIN value-filled future life of the embryo. Always, preferring an uncertain good to a certain evil is morally wrong. But surely this is a quantitative matter not a qualitative one. Certain, limited aspects of the rest of the mothers life will be adversely effected and can be ameliorated by societys helping hand and intervention if she does have the baby.

The decision not to have it is both qualitatively and qualitatively different. It is to deprive the unborn of all the aspects of all his future life in which he might well have experienced happiness, values, and meaning.
